

Alpharetta Elementary Vision and Commitment to Digital Citizenship

Alpharetta Elementary is committed to educating all students to be positive, knowledgeable, and responsible members of the online global community. Rather than just using electronic devices for fun or school work, AES is striving to teach students to be a fully functioning online participant in a safe and knowledgeable manner. To accomplish well-rounded electronic usage, students need to be prepared and know how to handle various situations that they encounter online. Students need to be critical thinkers of online material, so they can discern between valid and invalid information. Finally, students need to understand and practice the value of balancing online usage with the importance of other interests and physical activity.
