

Hembree Springs Elementary

Student E-Resource Access

There are several ways to access eBooks and online resources from home. (If you are at school, simply click on the Launchpad computer icon.)

*Go to <https://launchpad.classlink.com/fcs> and log in using your lunch number and birthday (mmddyyyy).

The MackinVIA app is where you can search databases, find e-books, etc...

- If you choose a book to read that prompts you to log in under “FollettShelf” (the old system), simply put in **hembreesprings** and **student**.
- Some books are Professional Development and some are chapter books. The majority are Common Core for curriculum support. However, you can also access Tumblebooks from the list of Databases, which is an excellent online picture book site that also has a mobile version if needed. Brainpop and other online resources are available here as well.
- You can check out books when you are logged in. You may also read them on any device if you have the MackinVIA app downloaded from whatever app store your device uses.
- If you are on the app, it will prompt you to log in with your lunch number and birthdate and then download the book from the list of books that you have checked out. The books will appear in your "backpack", which is in the top right corner of the webpage.
- Books will automatically turn themselves back in after two weeks unless you go in and renew them.
- Need more information? Go to the "help" link at the top of the MackinVIA page above your name for great short video tutorials.

Other apps available on Launchpad include:
