Welcome to AP Computer Science. I think that you will find this to be one of the most important courses that you will take in High School. While many of you will not go on to major or build your career in a Computer Science field, the skills that you acquire in this class should serve you well no matter what career path you ultimately choose.

The following is your summer assignment for the AP Computer Science course:

1. Watch the following video: Every Student in Every School Should Learn How to Code!
2. Once AP Textbooks are available for pick up, please secure your AP Computer Science Textbook from Mr. King. It is titled: Java Software Solutions for AP Computer Science by Lewis, Lofting, and Cocking, 2nd edition.
3. Sign up for Edmodo and use the following code to join our class. z8iy66
   In 14 days the code will lock and when you try to join you will be put in a queue where I will have to approve your request to join the group.
4. Read Chapter 1 of your textbook
5. In Edmodo see your assignment that includes two vocabulary worksheets. Once completed, please upload to Edmodo.
6. Be prepared for a quiz over Chapter 1 and the related vocabulary the first week of school

Have a great summer and I look forward to working with you next year!
