

AP Classes Sign up Process

AP Registration –

This year, the AP registration process starts with teacher recommendations. Students and parents are encouraged to strongly consider their recommendation, preparedness, and motivation to meet or exceed the scholarly expectations of these courses. As teacher recommendations are completed, students will receive course verification forms for their core classes around Feb 14.

Students committing to AP classes are encouraged to normally follow a sequential progression of adding 1 AP course per year as they demonstrate success in their current courses.

As the Verification Process occurs, students will have the opportunity to Elect into AP courses if they meet the district guidelines or if they do not have a current teacher that can recommend them. Students and parents that elect into an AP course agree to the stipulations on the verification form. They can also “opt out” of AP courses that they have been recommended for at this time. This process during course verifications replaces the waiver process that had been in place.

The only AP Applications that we will utilize this year are for AP Computer Science Principles and the AP Seminar Course as part of AP Capstone. Students have until Feb 21st to complete these respective forms available on the Hooch AP website Feb 1st.
