Dear Parents and Guardians,

We are pleased to announce that Fulton County Schools has selected Infinite Campus as our Student Information System.

This system will replace eSchoolPlus and will be available to all schools and families starting in July 2019. Infinite Campus is a trusted name in student information, serving over one million students in Georgia alone. We join several neighboring districts such as Forsyth, DeKalb and Atlanta in utilizing one of the best-in-class products available today.

Infinite Campus is user-friendly, intuitive and robust. It is being designed with Fulton staff, parents and students in mind to provide real-time, online access to student information. The product features and enhancements include a new portal for parents and students (and mobile app), an enhanced gradebook for teachers, user-friendly Online Registration and tools to assist in maintaining student data.

Parents & Students,
information is at your fingertips.
Available starting July 10, 2019!

Parents will create new accounts for Infinite Campus. Emails will be sent to all parents with an active email address in July to set up their account. Students will use their FCS account information to access.

Campus Parent and Campus Student will replace Home Access Center (HAC) and Student Access Center (SAC). District personnel, parents and students participated in demonstrations and feedback forums to provide input on the features, functionality and processes related to these modules. The configuration decisions for these modules were based on their important feedback.

Please visit the Fulton County Schools website for more information!
