

## Free AP Practice Exams through Georgia Virtual School.

This is a wonderful free opportunity for our AP students. Although not endorsed by the College Board, each practice exam gives students background information concerning the test, including time limits for each section, and a full list of vocabulary terms they should know. In addition, students have the ability to take a full practice exam and receive detailed feedback on their answer choices.

Students do not have to be enrolled in a GA Virtual course. Non-GAVS students may register for these practice exams beginning **March 1st** and practice exams will be available through May 30th. The exams are free of charge to students, however you must be registered and have an account with Georgia Virtual School to gain access. Please direct students to Mrs. Jackson in the Guidance Department for registration information.
