

December 3, 2018

Dear Parents,

This afternoon, Atlanta Watershed reported a water pressure issue at the Hemphill Pump Station and issued a Boil Water Advisory until further notice. This pump station services our school, and may possibly service your home as well.

As part of our safety procedures, we restricted access to all water sources and drinking fountains by placing "DO NOT USE" signs and/or marking off the area with tape or plastic bags. This water issue did not impact today's breakfast or lunch services.

We expect this issue to be remedied immediately, but please know that our school has a plan for meals should the advisory remain in effect tomorrow.

Sincerely,

Jarvis Adams, Principal
