Dear Parents/Guardians,

If you've visited our school recently, you likely saw some minor construction occurring at our front entrance. This was the installation of a new locked entry system that will allow our staff to monitor building visitors.

The system has visual and audio capabilities that allow our front office personnel to view visitors on a monitor, ask questions, and then decide whether to allow them entry. Funded by eSPLOST (the one-penny sales tax for education), this system will provide greater security to our school by making sure all visitors are acknowledged and accounted for.

Here's what you can expect. When you approach our front entrance, you'll see a small box that looks like a doorbell. You'll press a call button and speak into a camera and intercom. One of our school staff members will ask some questions about your visit. Upon entry, you'll then proceed to the front office to finish checking in.

We pride ourselves on being friendly and welcoming to everyone who enters our building. But, as much as we try to personally know every person, we have hundreds of students with hundreds of family members. This means we may not always recognize every person who visits our school, so please be patient and understanding if it takes a little more time to determine who you are.

Thank you for helping us continue the safe environment we have worked hard to maintain.

Sincerely,

Ms. Pammy Darden
Principal
