Health Registration Requirements for the State of Georgia

Immunization Certificate Georgia Form 3231
A Certificate of Immunization must be on file for each child attending school in Georgia. Complete 3231 certificates include: Diphtheria (4+), Tetanus (4+), Pertussis (4+), Polio (3+), Measles (2), Mumps (2), Rubella (1), Hepatitis B (3), Hepatitis A (2), Varicella (2), or Documented History or Serology.
Effective July 1, 2014 children born on or after January 1, 2002 who are attending 7th grade and for new entrants into a Georgia school grades 8th through 12th must have received one dose of Tdap (tetanus, diphtheria, pertussis) vaccine and one dose of meningococcal conjugate vaccine. “New Entrant” means any child entering any school in Georgia for the first time or entering after having been absent from a Georgia school for more than twelve months or one school year.

Ear, Eye, and Dental Screening
All students entering a Georgia school for the first time should have a Certificate of Vision hearing, Dental and Nutritional Screening. Certificates must be presented to school authorities, indicating that the student has received an ear, eye, dental and nutritional screening within the past year. The form must be completed by a physician/doctor, local health department and/or other health care professional or organization as outlined in the state guidelines for “Who Can Conduct the Screenings?” for form 3300-Rev 2013. If a student does not have a certificate at the time of enrollment, these examinations must be completed within four months. The Georgia Department of Public Health requires that Form GDPH 3300 be used for these screenings. This form can be obtained from the Fulton County Health Department or a private physician/dentist. Students who were previously enrolled in a Georgia public school should already have filed this certificate and should not be required to file a new certificate upon enrollment.

Information for Getting Shots

1. Take your child and his/her shot record with you when you go to get a certificate. More shots may be needed.
2. A doctor or health official where the shots were originally given can replace a lost immunization certificate.
3. Out-of-State immunization certificates **MUST** be changed to a Georgia certificate by a Georgia doctor or health official.
4. Shots may need to be taken again if the original records cannot be located.
5. Your child must be present for the Eye, Ear, and Dental examination.
6. Call and check local health center’s hours and availability of appointments.
